# Salt(Stack)

- Remote Execution
- \* Configuration Management
- Event-Driven Infrastructure
- Orchestration

# How it works

- Master - Minions
  - Masterless/Agentless
- SSH, ZeroMQ, RAET
  - Secure Communication

# Configuration Management

- States
- Formulas
- Templates (Jinja 2)

# Using Salt

- Grains (Minions)
- Pillars (Configurations)
- Mine (Global)

# FAQ

- Acho que não roda no meu Solaris
- Parque de máquinas pequeno, não compensa
- Meu script de 10 linhas faz a mesma coisa
